FIRE FROM FRICTION.

A New Danger in the Running of

Vestibule Trains. PITTSBURG, Pa., September 4.—The limited train from the east was thirtyfive minutes late last night on arriving, through one of the most unexpected as well as surprising accidents which has happened since the vestibule train has been started. Between Philadelphia and Harrisburg the roofs of the two forward coaches caught free through friction, which were off the rubber casing, and got the steel plates red hot. The fire was easily extinguished at Harrisburg but the fact of fire being so easily but the fact of fire being so cashy origi-nated has set railroad people to thinking of a new way to obviate such accidents. The train went through to Chicago with out changing cars, but a meeting will be held within a few days to devise some means of avoiding this new danger to vestibule trains.

Bank Failure.

CHESTON, Iowa, September 4.-The Cheston, Iowa, September 4.—The failure of the banking house of L. S. Brooks, of Lenox, Monday, caused much excitement here, and it is increasing. Brooks and his eashier have been arrested and a crowd of depositors of the bank have threatened them with personal violence. Attachments have been levied upon all of Brooks' property. The sherin found the vault empty. Brooks says he will pay, but creditors are not hopeful.
